

7 Great Resets of Human DNA

In recent years, some world leaders have been promoting a coming “Great Reset” that will affect people all over the world in terms of financial and societal issues (see [Now is the time for a 'great reset'](#)). However, this is merely symptomatic of greater spiritual issues that are present. In light of this, it is worthwhile to understand seven great resets of human DNA in history related to the unseen spiritual realm.

Since the time when God created Adam and Eve, deoxy-ribonucleic acid (DNA) has been at the center of spiritual conflict. Basically, a person’s DNA not only uniquely defines who a person is at a genetic level, it also identifies him or her at a spiritual level. It is also an expression of God’s creative genius (Psalm 139:13,14), and to some extent it is an indicator of how God views a person in light of choices he or she has made as well as choices that his or her ancestors have made. And those choices have not been made in a vacuum. Instead, they are the result of constant struggle between good and evil in people’s hearts and souls. And this includes how people deal with temptation from Satan. God designed it this way as a test of faith and loyalty.

This paper describes seven great resets of human DNA in history, including how it has changed, how it is being changed today and how it will change in the near future. The following chart summarizes these seven great resets:

No.	Reset	Nature	Cause	Result
1	Immortal DNA lost	Judicial (Past)	Eating forbidden fruit	Death
2	Chimeric DNA phase 1	Adversarial (Past)	Forbidden sexual union	Hybrids and much evil
3	Chimeric DNA phase 2	Adversarial (Past and present)	Forbidden sexual union	Hybrids and much evil
4	Immortal DNA partially restored	Redemptive (Past, present and future)	Blood, grace, faith	Salvation and redemption
5	Chimeric DNA phase 3	Adversarial (Present)	Genetic engineering	Synthetic humans
6	Chimeric DNA phase 4	Adversarial (Future)	Nanoparticles, DNA origami	Satanic possession
7	Immortal DNA regained	Inherited (Future)	Resurrection at the last trump	Glorified body, no sin

1. Immortal DNA lost

After God created Adam, He gave him meaningful work to do and lots of freedom. The only test of faith and loyalty was the fruit of the tree of the knowledge of good and evil. God said not to eat it or else Adam would die (Gen. 2:16,17). After God created Eve, Adam taught her this command. Sadly, God's adversary, Satan, tempted Eve by twisting God's words and appealing to her sense of beauty, her appetite, and her desire for forbidden knowledge, so she got scammed. Adam was not deceived (1 Tim. 2:14), but he went along to get along. After all, Eve was the most beautiful woman on earth at that time, and he loved her (Gen.

3:1-6). At that instant, they died spiritually (Rom. 6:23), became separated from God (Isa. 59:2) and experienced the first great reset of human DNA. This involved God changing their DNA to a degraded form so that they lost their ability to live forever in their physical bodies. In fact, Adam died when he was 930 years old (Gen. 5:5), which was within 1000 years – what God considers to be one day (Ps. 90:4, 2 Pt. 3:8). Since Adam’s DNA was degraded, it got passed on to all his descendants. This DNA degradation also included tendencies to sin as well as curses that got passed on to future generations (Num. 14:18, Jer. 32:18; Rom. 5:12-21, 1 Cor. 15:21,22).

2. Chimeric DNA phase 1

Although Satan was successful in getting Adam and Eve to lose their immortal DNA, he has never ceased in his desire to further mess up God’s beautiful creation in any way possible, especially the human DNA. So after a few hundred years, some of his subordinate angels (aka “sons of God” – Job 1:6, 2:11, 38:7) deserted their own dwelling in heaven (Gen. 6:1-4, Jude 6) to entice human women to marry them. These women made freewill choices to enter into forbidden marriages, and the result was giving birth to evil giants with hybrid DNA or “chimeric DNA” as it might be called in scientific literature today. This resulted in the introduction of new forms of evil and the rapid spread of evil all over the world. After a few hundred years, human DNA was also widely corrupted through hybrids marrying or raping normal women, so that all their offspring had corrupted DNA. This made God grieved and angry, so He destroyed all the evil giants and all humans and animals with chimeric DNA in a global flood. Only Noah, his wife, their three

sons, their sons' wives and pairs of non-chimeric animals survived on Noah's Ark (Gen. 6:1-8:22).

Gen. 6:9 says that Noah was a just man and perfect in his generations. The word "perfect" is *tāmîm* in the Hebrew text (Strong's H8549), and it can also be translated as "without blemish or spot," as in Ex. 12:5, where God required the Passover lamb to be without blemish (H8549). Furthermore, the LXX Greek translation of the Old Testament uses *teleios* (G5046) for *tāmîm*, and *teleios* also means complete or perfect. Since Noah had sin like the rest of us (Rom. 3:23), his perfection was related to his genetic make-up, i.e., his DNA. Thus, Noah and his family passed God's test, but everyone else failed.

3. Chimeric DNA phase 2

According to Genesis 6:4, another group of disobedient angels also deserted their dwelling in heaven and impregnated women after the global flood, and we actually have more details about their gigantic offspring (Num. 13:32,33; Dt. 2:10-12, 20-23; 3:11; 1 Sam. 17:4,5; 2 Sam. 21:18-22; Amos 2:9). Some people also believe that this has happened throughout history, although many of the hybrids have allegedly looked like normal humans in size and appearance.

4. Immortal DNA partially restored

2 Cor. 5:17 says, "If anyone is in Christ, he is a new creation: old things are passed away; behold, all things are become new!" Thus, when a person repents of his sin, trusts in the LORD Jesus Christ as his Master and Saviour and is born again, God begins to change his DNA back towards what it was like for Adam before the fall. Ongoing changes can

be accomplished in a supernatural way (without medical assistance) through fearing God and turning away from evil (Pr. 3:7,8), explicitly breaking curses by faith (Gal. 3:13,14) and receiving deliverance (Lk. 10:19,20) and healing (James 5:14,15).

5. Chimeric DNA phase 3

The LORD Jesus Christ said, “The thief comes to steal and kill and destroy” (Jn. 10:10). He was talking about Satan. Just as man has produced all kinds of modern technology, Satan has produced new tricks. In fact, he has been the driving force behind much of modern science and technology, and his covert plan is now manifesting globally.

Tragically, billions of people around the world have been making freewill choices to receive experimental injections that are all based on a virus that was designed in a computer. Since the virus includes HIV-1 genomic fragments for gain of function, the injections are able to function as Baltimore Class VI retroviruses to reverse transcribe and change people’s DNA, producing “chimeric DNA” according to scientific literature.

This technology has been under development for decades. Experts in the field of synthetic medicine believe that they can use this “gene and cell therapy” (GCT) to “fix” people’s genetic defects, and the injection mandates have kickstarted GCT, turning people into synthetic humans or “synths.” It is utter pride and vanity, because it is going against God’s plans and purpose, and nobody but God can foresee all the long-term side effects. Frankly, it makes God very angry!

In the spiritual realm, the result is the setting up or establishing of the “abomination that causes desolation” as spoken of by Daniel the prophet (Dan. 11:31, 12:11). *[To avoid confusion, note that Dan. 9:27 is unrelated, because it is talking about the overspreading or nullification of abominations.]* The LORD Jesus Christ explained that this abomination of desolation would be standing or put (Strong’s G2476, *histēmī*) in the “holy place” (Mt. 24:15-22) or where it should not be (Mk. 13:14-20), i.e., the Temple of God. When He spoke, He was responding to His disciples’ enquiry about the destruction of the Temple buildings (Mt. 24:1-3; Mk. 13:1-4; Lk. 21:3-7), but He knew that the bodies of His followers would soon become the new Temple of God (Acts 2:1-4; 1 Cor. 3:16,17; 6:19,20; 2 Cor. 6:16; Eph. 2:21,22), just as His body at that time was a Temple of God (John 2:18-21).

Being God, He knew that the establishment of the “abomination that causes desolation” would be at a cellular and a genetic level, not in a temple building. After all, He had already declared that the temple building would be left desolate (Mt. 23:37,38), repeating what the Angel Gabriel told Daniel hundreds of years earlier (Dan. 9:26). In other words, The temple building became desolate spiritually upon His death (Mt. 27:51) and desolate physically when the Romans destroyed it in 70 AD. Jerusalem will remain desolate until He returns, and construction of a third temple before that (Rev. 11:1,2) will not change that.

The abomination that causes desolation is currently the most existential threat to humanity. It is also called the “Mark” of the 7-headed Beast that is described in Revelation 13, as it adds Satan’s chimeric genetic markers to people’s DNA. It is part of a strong delusion that God has sent to make people believe the lies of the official narrative, because they have not loved the Truth (2 Th. 2:10,11).

6. Chimeric DNA phase 4

The injections being given globally today include billions of lipid nanoparticles that have various functionalities. The identity of the nanoparticles can be determined through a reverse engineering process called aetiology. Here is a summary of what some are designed for:

Adverse Side Effects	Nanoparticle (Cause)	Functionality
Blood clots	Graphene-oxide-coated antennas and routers	Telecommunications inside and outside the body
Blood clots	Graphene-oxide-coated robots and computers	Execute specific programs, like DNA origami
Suppressed chelation and too much iron	Ferritin-encased iron quantum dots	Self-assembling coatings to regulate iron concentration for magnetic manipulation of atoms
Damage to the central nervous system and other organs	Quantum dots coated with Luciferase (aka SM-102)	Bioluminescence for authentication and identification with NIR light-reading cameras

Satan's endgame is to use some of these nano devices to serve as 5G/6G Wi-Fi signal transceivers so that the new race of synths can undergo further transformation into fully synthetic life forms through the process of DNA origami. After a high enough percentage of people around the world have become synths and have enough nano devices

delivered into their bodies by a hypodermic needle or microneedle array patch, a switch will be flipped to activate the DNA origami process. Then, all the synths will have their DNA folded into quantum annealing processors. This will then enable them to be quantum entangled with a global quantum computer system, so that Satan will be able to make himself like the Most High (Isa. 14:14). Then, his assistant, the Antichrist, will be able to virtually sit in the Temple of God and proclaim himself to be God (2 Th. 2:4), since he will be able to command and control the brains and memories and perceived reality of all the synths. For these pitiful souls, it will be like living in virtual reality without a headset or OFF switch. They may feel good at first, but when God begins to send painful stings from nasty locusts that sting like scorpions (Rev. 9:2-12) or loathsome and malignant sores (Rev. 16:2), they will not be feeling too good about their new “extreme reality.” Eventually, they will end up in the Lake of Fire, and they will suffer great regret (Rev. 14:9-11).

7. Immortal DNA regained

The good news is that for the sake of the elect, the LORD Jesus will return and cut those days short (Mt. 24:22). All the elect have to do is resist the Mark of the 7-headed Beast and endure until the end so that they can enter into their rest (Heb. 3:5-4:11). Then, the LORD Jesus Christ will return and transform their DNA to an immortal state and bring them to Heaven and the Great Marriage Supper (Mt. 22:1-14; Mt. 24:29-31; Mt. 25:1-13; 1 Cor. 15:20-58; Rev. 19:7-10). This new DNA may be even better than what Adam and Even had before the fall! It is definitely something that is worth waiting for and suffering for now.
