

Satan's Digital Counterfeit of God's Communication with Humans

(Note: this paper is only intended for people who have not become gene therapy guinea pigs.)

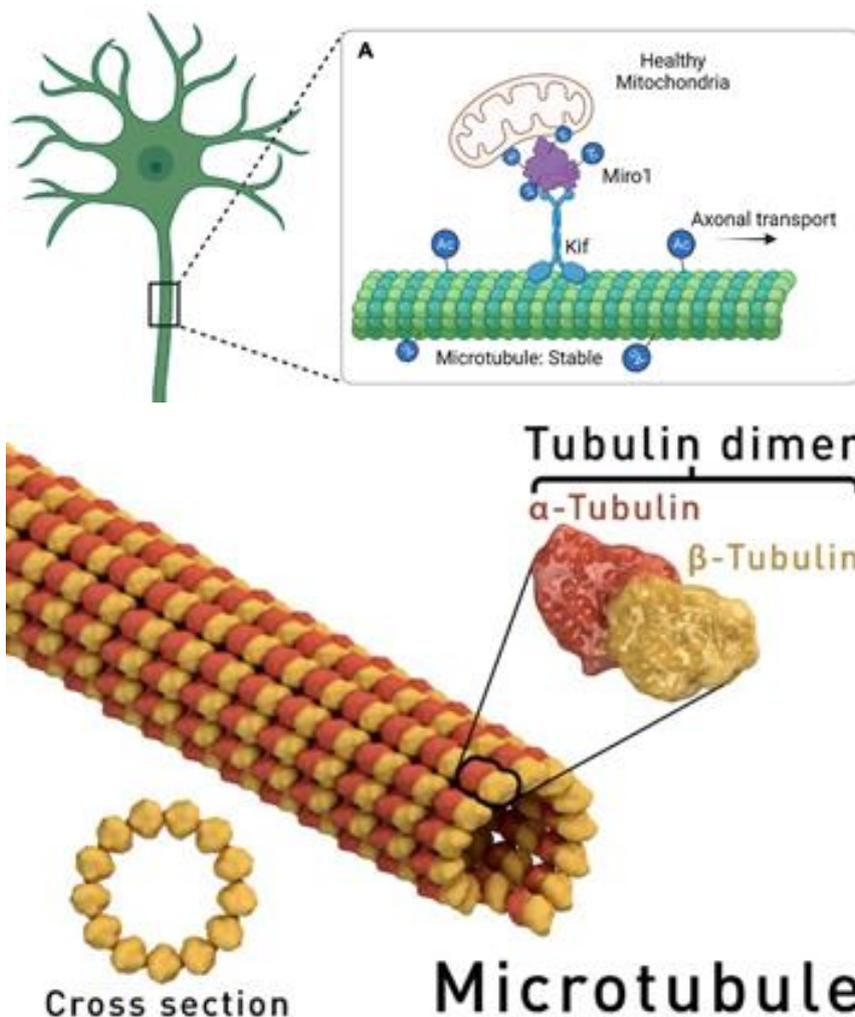

*“Now, son of man, will you judge, will you judge the bloody city?
Yes, show her all her abominations!” – Ezekiel 22:2*

God wants to have two-way communication with humans. So does Satan. God's communication system is based on love and free will, and its core elements are prayer and meditation upon Scripture. Satan has given men knowledge to enable them to develop a digital counterfeit of God's communication system. This system is based on autonomy from God and a lust for money, power, control, comfort, convenience, and material things. Its core elements are mechanized divination and digitalized DNA that can interface with a quantum computing network and the Internet of Bodies that is designed for 24/7 total mind control. By early 2022, over half of the world's population was unknowingly equipped with the required nano-scale infrastructure for the soon-to-be-activated DNA digitalization. Following is a brief introduction that you need to know about this insidious system and how it came to be.

65,536 Tubulin Dimer Pairs

God designed and created the **human body** in His own image (Gen. 1:27). With all of its intricate systems, it is the most wonderful thing in all of creation (Ps. 8:5, 139:13,14)! The **human brain** is the most amazing part of the human body! Interestingly, God created each microtubule in each neuron of the human brain with $2^{16} = 65,536$ **tubulin dimer pairs**. Keep this number in mind. It is a special number designed by God but misused by Satan and his servants.

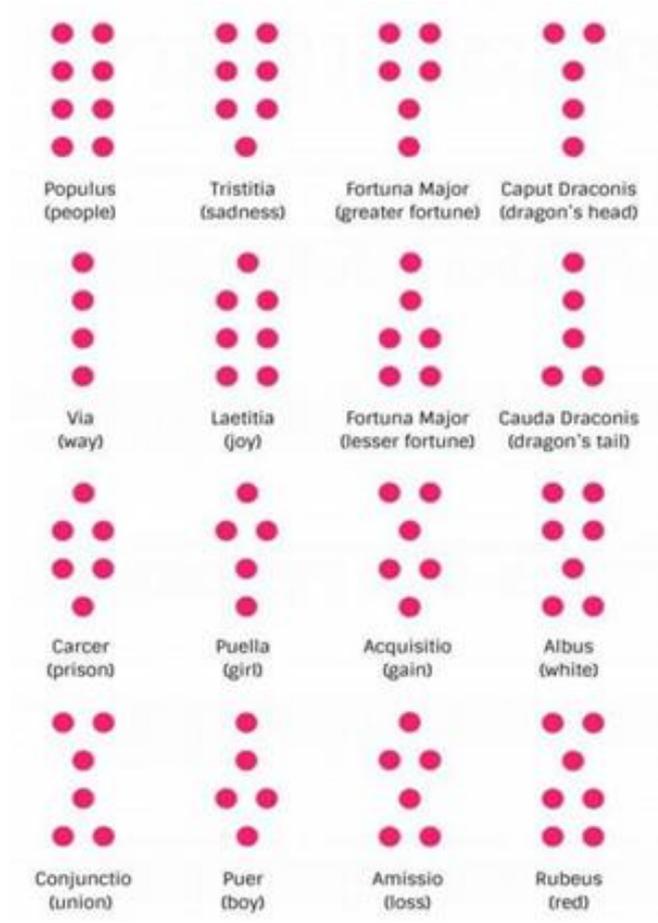

Divination and Geomancy

Divination is an ancient practice of communicating with evil spirits to seek forbidden knowledge about the future or unknown things by supernatural means. Satan and his servants have been promoting it for thousands of years. **God does not want people to seek forbidden knowledge (Deut. 18:10), because it can produce information that is harmful to people in both spiritual and physical aspects.** One form of divination is geomancy, which originated in Africa. In Greek, geomancy means "divination by earth." The Arabic name, ilm al-raml (لم الرمل), means "the science of the sand." The practice eventually got carried along trade routes to China, where it was modified into I-Ching (易經).

65,536 Combinations of Geomantic Figures

The practice of African or Mideastern geomancy involves one person randomly drawing lines or making dots in the sand or dirt and then a trained geomancer going through a recursive process to convert the lines or dots into geomantic figures for interpretation. The number of possible geomantic figures is 16, and **the maximum number of combinations of the 16 geomantic figures is $16^4 = 65,536$.**

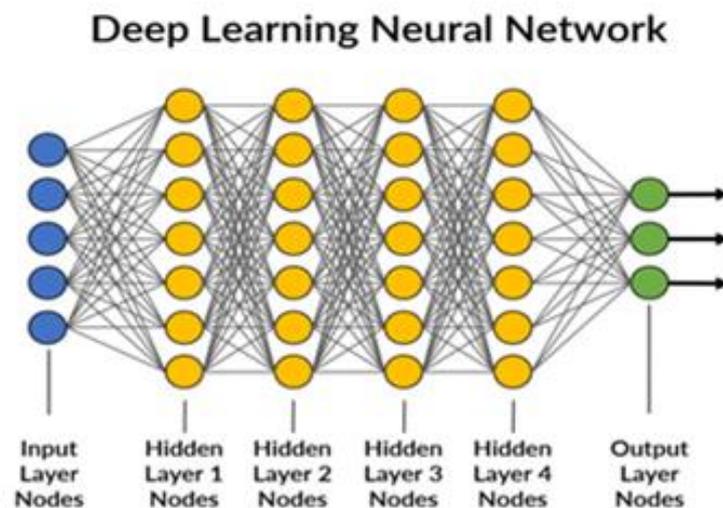

Computers: Modern Sand for Lines and Dots

Most computers today enable digitalized processing of text, audio, and images. They are made of integrated circuits composed primarily of **silicon, which is derived from sand or dirt**. Most computers are based on the binary (base 2) number system and on-off switches (transistors) that are electrically opened and closed in nanoseconds or picoseconds. Computers count and make logic decisions based upon switches being ON (“1” for data or “true” for logic) or OFF (“0” for data or “false” for logic). Binary numbers can easily be converted to the hexadecimal (or base 16) number system, and the binary number system also has 16 possible operators. Thus, **most computers are quite well-suited to serve as the sand or dirt for geomancy, and the binary number system is quite well-suited to store and process randomly generated lines or dots as data**. This is now a big issue, because massive amounts of data are constantly being generated by people and the Internet of Things. This “big data” is growing exponentially, and many companies now consider data to be of more value than people. Thus, **computers and big data together now provide the framework for geomancy on a scale never before seen in history!**

AI: Mechanized Geomancy

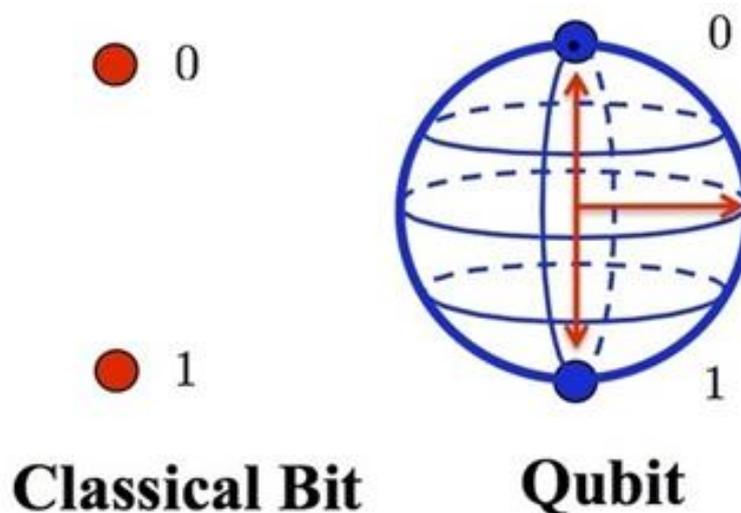

Artificial intelligence (AI) applied to big data is mechanized geomancy, as it performs the interpretive task that geomancers have done for thousands of years. This is especially obvious with advanced AI called deep learning, which is often referred to as a black-box process, i.e., humans cannot be sure what deep learning algorithms are doing. **Deep learning is based on artificial neural networks, which use algorithms inspired by the structure and function of the human brain. Although most people do not associate AI with anything supernatural or evil, we can see hints that it is.**

One example is NVIDIA's new AI system called "i am ai." Its name is an insult to God, because in Exodus 3:14, God identified Himself to Moses as "I AM" (אֲנִי־אֵלֹהִים), which means "He who is self-existing and self-sufficient" or "He who lives." Anyone who fears God is very cautious to even mention this name. It is only suitable for God, the Creator of the universe. **NVIDIA's pride and arrogance show that its AI is inspired by Satan and leading people away from God.**

Quantum Mechanics and Quantum Computing

God designed everything we know about the human brain and DNA – even down to the atomic level. When we think of the physical properties of objects in our visible world, we usually think in terms of Newtonian physics. However, **when we study the properties of matter at an atomic level, we see that almost everything in the known universe operates according to particle physics or electromagnetic wave forces. Quantum mechanics** is a fundamental theory in physics that attempts to predict properties of atoms and subatomic particles. **Quantum physics** is a branch of science that focuses on quantum mechanics. **Quantum computers** use the properties of quantum physics to perform computations at speeds not possible with classical computers. Quantum computers are based on **quantum bits**, aka "qubits," which can be 0, 1 or both, based on the predicted spin state of electrons. **The spin state cannot be identified precisely, but it can be predicted through AI, so quantum computing is also based on geomancy.**

Real World Quantum Computers Today

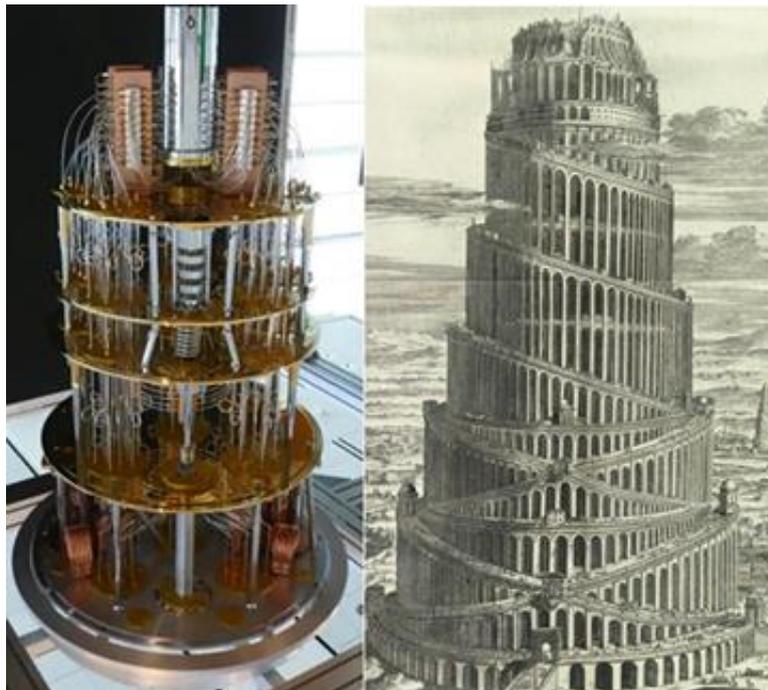

D-Wave was the world's first company to sell quantum computers, and it is the largest known manufacturer of quantum computers. IBM also has a quantum computer named Q.

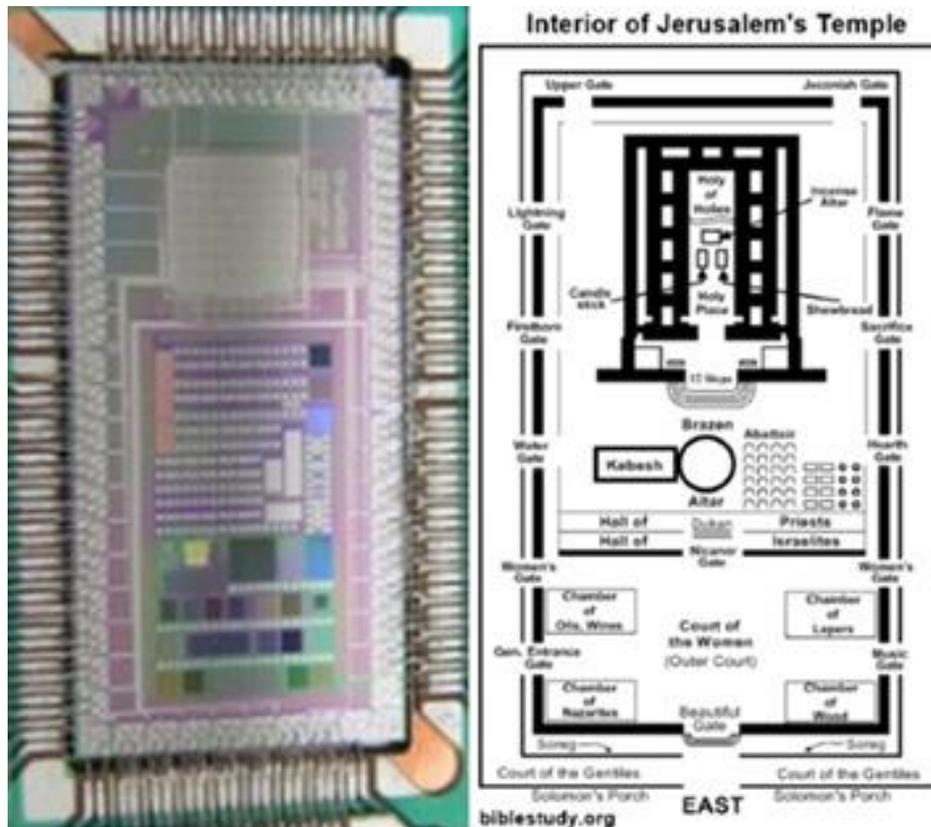

External disturbances cause quantum computers to lose their quantum coherence, so they must be completely isolated in an enclosed case at an extremely low temperature. They also must be isolated from Earth's magnetic field. Quantum computers can be used for cryptography, search problems, simulation of quantum systems, quantum annealing and adiabatic optimization, machine learning, computational biology, and computer-aided drug design and generative chemistry.

Quantum Computers: Digital Temples of Satan's Unholy Spirit

Satan normally operates in secrecy. Much mystery surrounds quantum computers today; they are very expensive and normal people cannot buy one and plug a keyboard into it. However, **we can see hints of Satan's hand in it when we make simple observations about D-Wave's quantum computer cooling system and its chipset.** The cooling unit when turned upside down looks very similar to the Tower of Babel, which represented pride and collective rebellion against God (Genesis 11:1-9).

The chipset of one D-Wave computer model looks similar to the original design of God's Temple in Jerusalem, which was a portal to Heaven.

Thus, we can see that quantum computing is associated with pride, collective rebellion against God, and interdimensional communication. According to the founder of D-Wave, [Geordie Rose](#), quantum computers can access parallel universes to acquire massive amounts of information. But this information is acquired through geomancy. Essentially, quantum computers are portals for communicating with evil spirits to acquire knowledge forbidden by God. In exchange, the evil spirits are gaining access to human souls. Basically, quantum computers have become digital temples of Satan's unholy spirit! This is one reason that the world is becoming increasingly complicated and evil. It is also why people who are not seeking Adonai are believing lies and trusting in science and technology rather than Him.

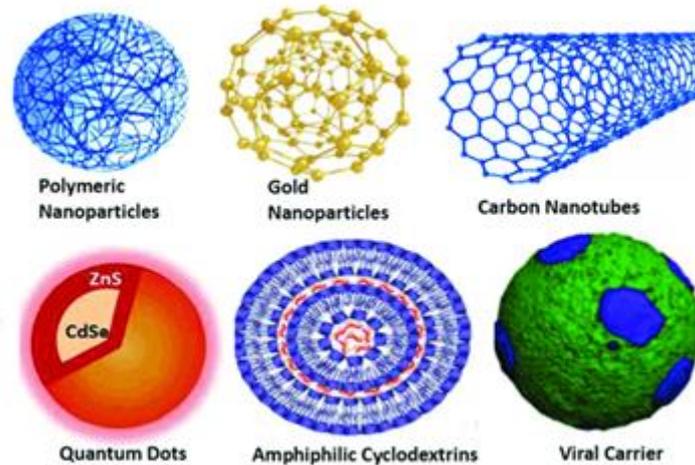

65,536 Qubits for Digitalized DNA

D-Wave's 10th generation model uses **65,536 qubits**, which enables it to smoothly interface with the **65,536 tubulin dimer pairs** in the microtubules in the neurons in human brains. In other words, **Satan has been giving men the technology to digitalize many aspects of life, and his final conquest is the digitalization of**

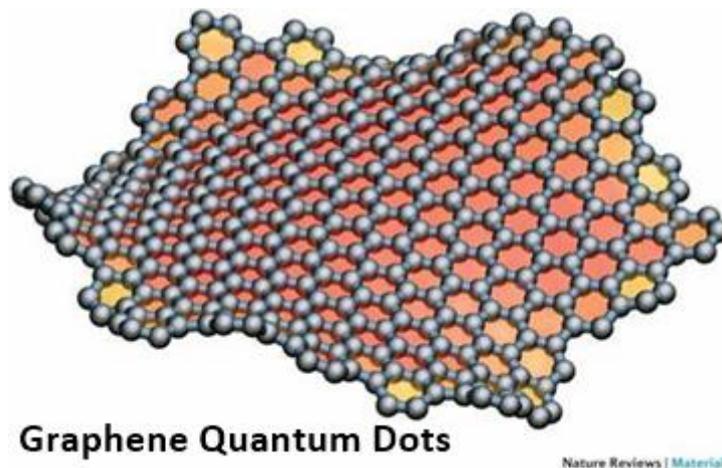

human brains. This is not an upgrade. It is a downgrade to a level at which Satan can counterfeit God's communication with humans.

Quantum Dots and Digitalized Humans

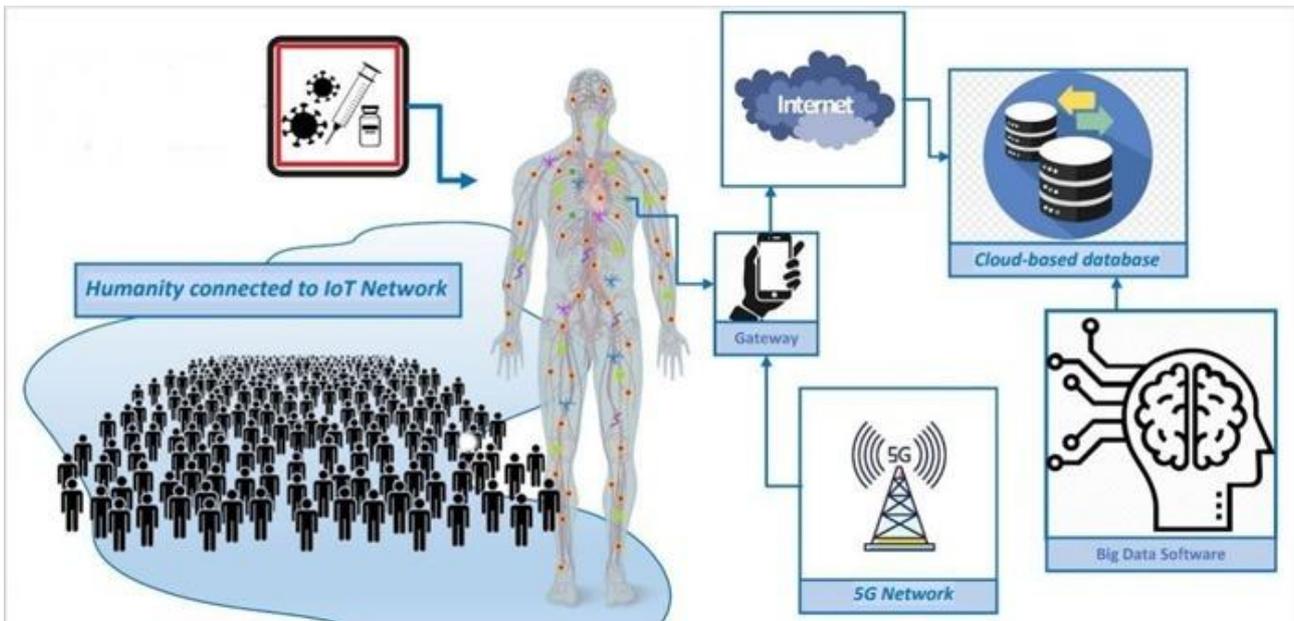

One nanometer is on billionth of a meter. Nano technology employs various types of nano particles that are several nanometers in size. They have various functionalities.

Quantum dots are artificial atoms that are used extensively in nano technology today. They are semiconductor particles a few nanometres in size, having optical and electronic properties. Some are coated in **graphene oxide**, and some are coated in **Luciferase**.

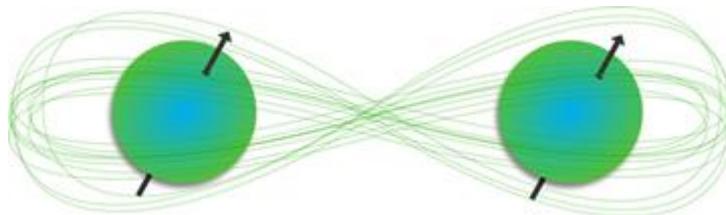

Today, **billions of quantum dots and other nanoparticles are dispersed throughout the major organs of the majority of the world's population.** Delivery is being done quietly without much media attention because Satan controls the media and does not want people to know what they are receiving.

These people unknowingly allowed the nano particles to be delivered into their bodies due to misplaced hope and faith or for the sake of convenience or comfort. In Daniel 11:31 and 12:11, the quantum dots together with all the other technologies being delivered are called “the abomination that causes desolation,” because they cause both physical and spiritual desolation. **Quantum dots and other nano particles provide the infrastructure for humans to become edge computing devices on the Internet of Bodies, so they can conveniently communicate with Satan and his quantum computer network.**

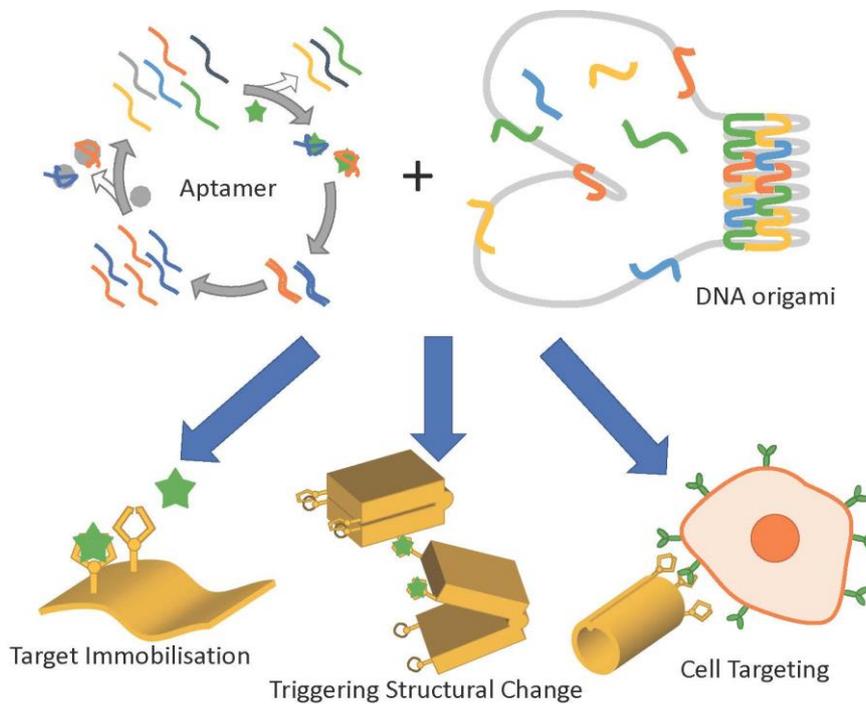

Quantum Entanglement

One special property of quantum computing is called **quantum entanglement**, which is like an invisible soul tie at an atomic level, as it is not limited by distance.

Quantum entanglement enables two electrons to become superimposed, and **it enables digital communication between quantum dots in human brains and a quantum computer network.** But it first needs to be activated – which is coming very soon worldwide. All that is required is the flipping of a switch to activate a process of DNA origami in those who have received the quantum dots.

Then, these people's DNA will be digitalized and transformed into quantum annealing processors that can be quantum entangled with a global quantum computer network. This is Satan's digital counterfeit of God's communication system.

Various evolutions of DNA origami in combination with dynamic, nanoparticle binding, and higher-order assembly capabilities, American Chemical Society, <https://www.osti.gov/servlets/purl/1657525>

Flipping the Switch On

The timing of the DNA origami switch being flipped on is unknown, but it could be very soon. During Queen Elizabeth's recent 70-year Jubilee ceremony, she touched a small globe to flip a switch and light up lights arranged in the form of a DNA helix with a third strand going through the middle.

The lights lit up the strand until it met and lit up a tree, which represents Satan and his quantum computer network. She and her group were celebrating the fact that 60% of the world's population already has the nano hardware installed, and they are eager for more to accept installation so they can flip the switch to connect all of them to their boss, Satan.

Quantum Entanglement with God

If you prefer to live the rest of your life quantum entangled with God instead of Satan, then here is what you need to do:

1. Be in constant two-way communication with God through prayer and Scripture meditation.
2. Never accept gene and cell therapy (GCT) and the digitalization of your brain.
3. Trust God for provision, protection, and peace until He destroys the entire system.
4. If you are living in a smart city, move to a rural area ASAP, because people in smart cities may hate you.
5. Prepare mentally, emotionally, and logistically to live without access to the Internet, the banking system and the GCT health care system.
6. Spread this information with like-minded people so that perhaps they too can escape quantum entanglement with Satan.
7. Team up with like-minded people to go through this together and to help each other.

How blessed are those who reject the advice of the wicked, don't stand in the way of sinners or sit where scoffers sit! But their delight is in the Law of the LORD; on His Law they meditate day and night. – Psalm 1:1,2
